

Dexamethasone Suppression Test

Patient Information Sheet

Your Doctor will/should have given you a prescription for Dexamethasone tablets. Please have this script filled at your local pharmacy prior.

Take these two tablets (Dexamethasone 0.5 mg x 2) orally at 11.00 pm on

.....(*date*)

The following morning, return to:

- Nearest Pathology Collection Centre
- Your doctor's Surgery

between 8.00 am and 9.00 am or (*time*) for a blood specimen to be collected.

The Collector taking your blood sample will want to know the dose of Dexamethasone tablets taken and the date and time as this is required for part of the test report.
